01 Company Profile

The company is committed to providing comprehensive and high-quality intelligent integrated services for the industry, focusing on the high-end, intelligent, and green needs of manufacturing, and promoting industrial technological transformation and optimization upgrading.

- **Corporate philosophy:** Technology liberates people, serves people
- **Corporate mission:** Promote new technologies, equipment, and models of intelligent manufacturing
- **Enterprise positioning:** Providing customers with comprehensive solutions based on independent core technologies and products
- **Values:** Innovation, Integrity, Win Win, Responsibility

02 Business Segments---Conveyor Belt

02 Business Segments---Drum accessories

02 Business Segments---lift platform

02 Business Segments---Telescopic loading vehicle

02 Business Segments---Robot

激活 V

02 Business Segments---Coffee Robot

**Fully automatic coffee robot
Support customization**

02 Business Segments---Robot

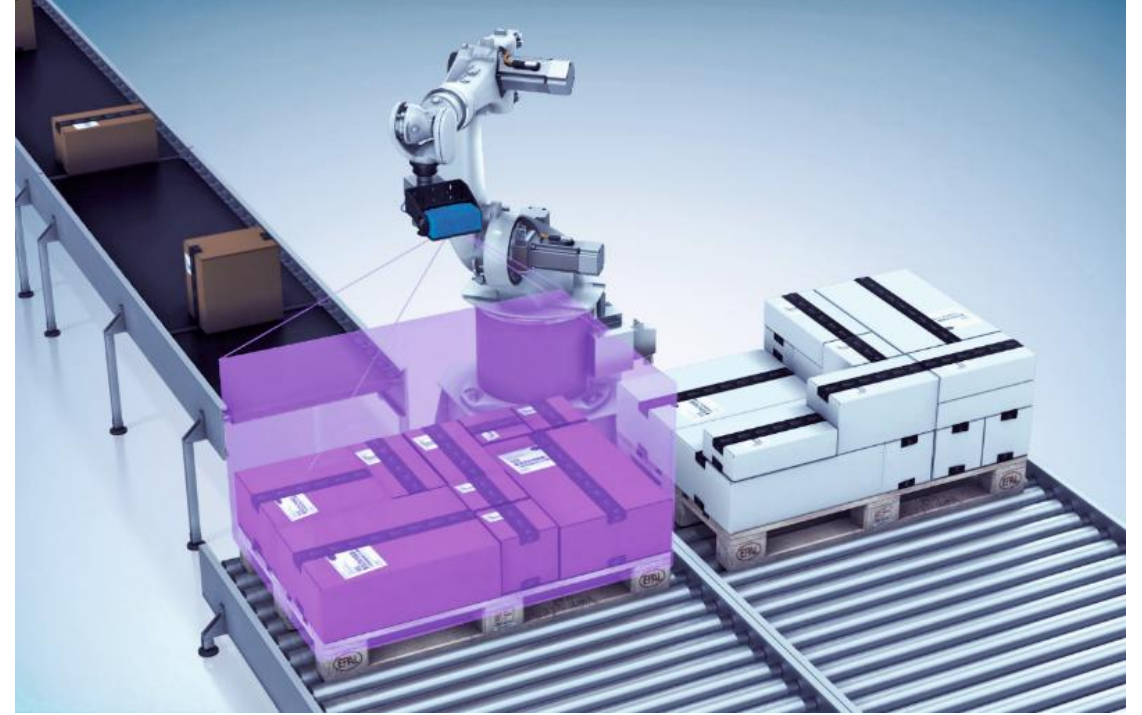

02 Business Segments---Robot

Robot palletizing

- Boxes, flour bags, grain bags, sticks, boards
- Single capture, double capture, layer code

Robot palletizing

- Boxes, flour bags, grain bags, sticks
- 3D Vision

02 Business Segments---Robot

Robot loading and unloading

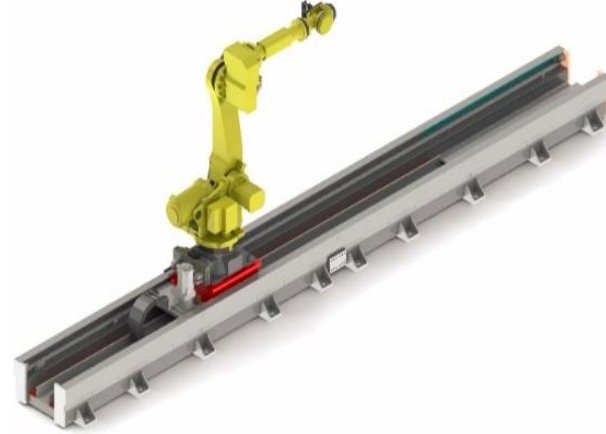

- Shaft type, plate type, shell type
- Dismantling and palletizing

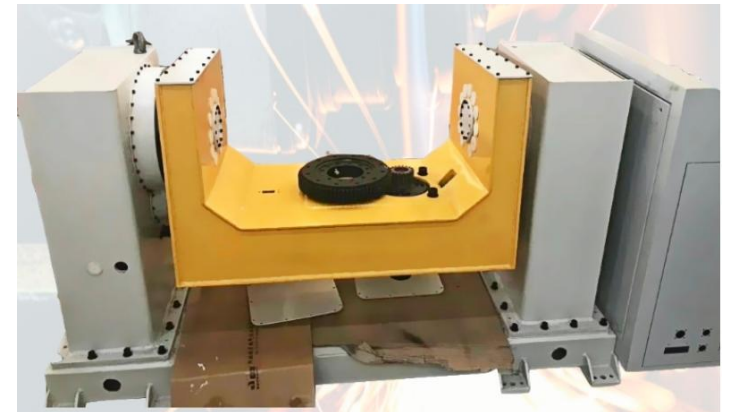

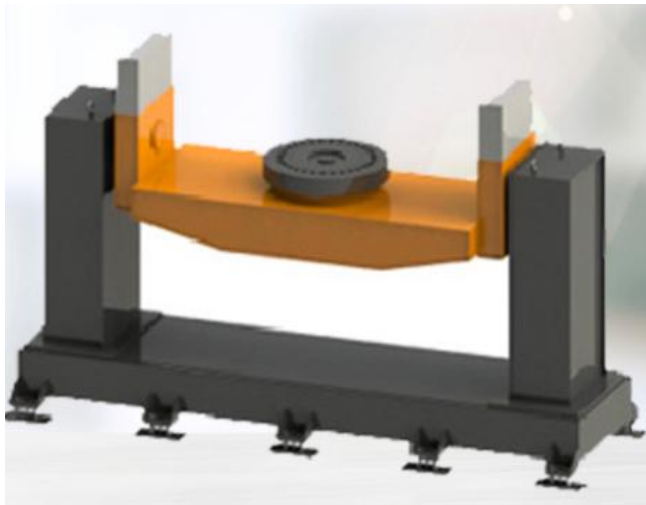

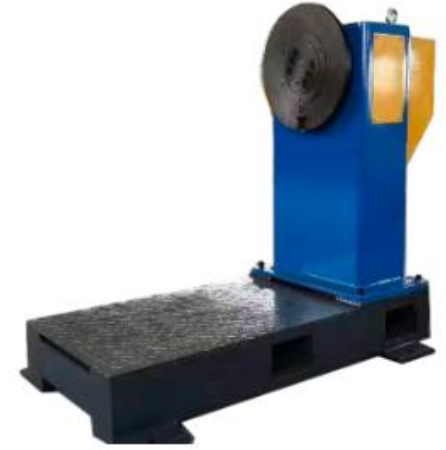

Robot welding

- Automotive, engineering machinery, environmental protection
- Laser positioning and tracking

02 Business Segments---Robot's seventh axis (walking track)

02 Business Segments---Robot positioner

02 Business Segments---Educational equipment

Deep Learning Visual Development Platform

The deep learning visual development platform mainly consists of a six axis collaborative robotic arm, a 3D visual grasping system, an industrial intelligent vision system, a PLC flexible automation system, and deep learning software; Equipped with an intelligent real-time robot operating system, it can flexibly expand various robot applications; Supporting two major functional attributes: practical training and scientific research; Meet the teaching and research needs of professional disciplines such as mechanical electronics, artificial intelligence, robotics engineering, and computer science.

02 Business Segments---Educational equipment

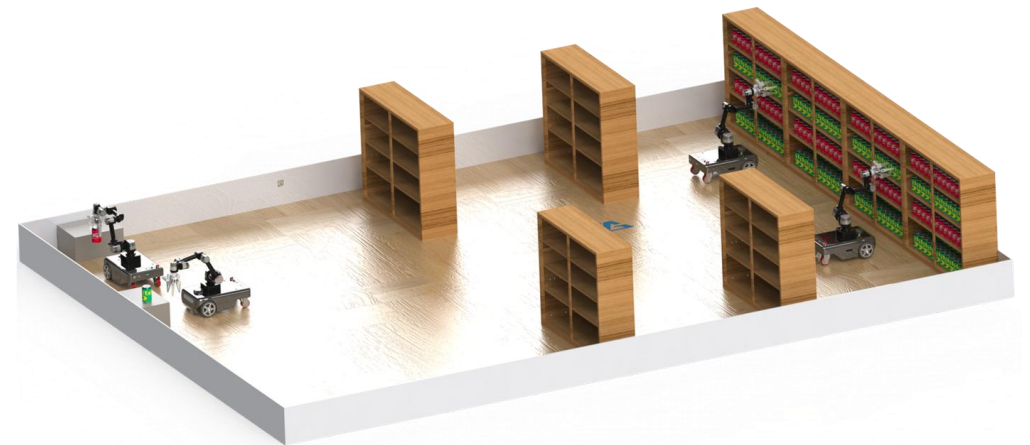

Intelligent Manufacturing Virtual Simulation Platform

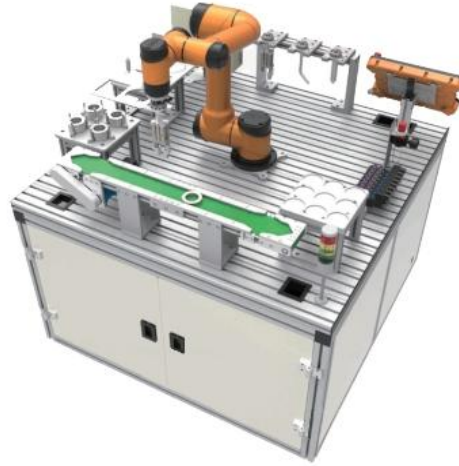

The system consists of a six degree of freedom industrial robot system, a PLC control system, a fixed-point handling and palletizing module, a trajectory simulation drawing module, an industrial robot RFID assembly and sorting module, an industrial robot simulation die-casting module, a simulation welding and polishing module, a basic belt line material palletizing module, a visual inspection feeding palletizing unit, a light curtain device, a multifunctional fixture unit, a gas source control unit, an aluminum profile frame, a touch screen electronic control unit, a module storage cabinet, and an equipment resource package.

02 Business Segments---Educational equipment

AI&ROS实验平台

02 Business Segments---Educational equipment

02 Business Segments---CNC machining

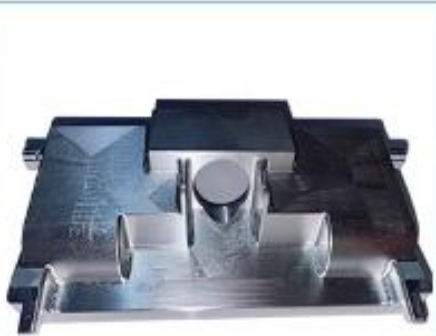

Processing range: stainless steel, carbon steel, plastic, nylon, sheet metal, 3D printing

02 Business Segments---CNC machining
